

Salinity in the Casamance Estuary

Occurrence and Consequences

Final presentation

Tuesday 5th of December the members of the project group Casamance 2006 present the results of their research on the hypersaline Casamance estuary in Senegal, West Africa.

You are invited to attend the presentation at 13:00 in room 3.98 at the Civil Engineering Building, Mekelweg 1 in Delft. There will be an informal drink afterwards.
